

## Graffiti in the city:

Fabiana Manosalva Michea II°D

We took a long walk for two hours in Peñalolen and discovered an important element in the city. Graffiti people expresses what they feel through the art, but sometimes the drawing are inappropriate for the place, for example in the photo you can see.

In the second photo, you can see different graffiti and colours used in the wal, but the drawing is painted in a space that can be private, not public. I shouldn't recommend to create graffiti in a private place because it could be a criminal act.

In the street I could see a graffiti on a stick holding the poster it is a signature of a name the stick is painted yellow, blue and pink.

When I am walking with my friend, I could see a kinder garten different from others, because the art expresses emotions and children, for example the fun of children in the kinder garden is the different nature that exist in the world.

Finally I think that art Peñalolen is nice and beautiful, but sometimes the drawings are inappropriate and persons don't agree because this graffiti are ugly and very obscene.

I should recommend that the art it can manifest itself in a different way, for example to beautify the city.
